KEY RISKS							
Specific Risks	<ul style="list-style-type: none"> • Credit and default risk Credit risk relates to the creditworthiness of the issuers of the Sukuk and Islamic money market instruments and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the Sukuk and Islamic money market instruments. In the case of 						

PRODUCT HIGHLIGHTS SHEET

rated Sukuk and Islamic money market instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a Sukuk and Islamic money market instruments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Sukuk and Islamic money market instruments. This could adversely affect the value of the Fund.

- **Interest rate risk**

Interest rate risk refers to the impact of interest rate changes on the valuation of the Sukuk and Islamic money market instruments. When interest rates rise, the pricing of Sukuk and Islamic money market instruments prices may decline and lower the market value of the Fund's investment in Sukuk and Islamic money market instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, we will manage the Sukuk and Islamic money market instruments by taking into account the profit rate and time to maturity of the Sukuk and Islamic money market instruments.

Note: Interest rate is a general indicator that will have an impact on the management of the Fund regardless whether it is an Islamic fund or otherwise. It does not in any way suggest that this Fund will invest in conventional financial instruments.

- **Liquidity risk**

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

- **Counterparty risk**

Counterparty risk is the risk to each party of a contract that the counterparty will fail to perform its contractual obligations and/or to respect its commitments under the term of such contract, whether due to insolvency, bankruptcy or other cause. In this regard, the Fund may be exposed to risks arising from the solvency of its counterparties and from its inability to respect the conditions of the contracts.

- **Concentration risk**

The Fund is susceptible to concentration risk. As the Fund is not subject to any limit or restriction for its placement in Islamic deposits with any single financial institution, there is a possibility that the Fund may be exposed to a single financial institution. The concentration risk is managed through the monitoring of credit analysis conducted on the financial institutions.

- **Shariah non-compliance risk**

There is a risk that the Fund may suffer losses when we have to dispose of any investments to rectify any Shariah non-compliance. If this occurs, the value of the Fund may be adversely affected. This risk is, however, mitigated through the appointment of Shariah Adviser, who will be responsible to ensure that the Fund is managed and administered in accordance with the Shariah Investment Guidelines set out in Section 3.1 of the Information Memorandum.

- **Capital distribution risk**

The Fund may distribute income out of its capital. The declaration and payment of distribution may have the effect of lowering the NAV of the Fund. In addition, distribution out of the Fund's capital may reduce part of the Unit Holders' original investment and/or capital gains attributable to the original investments and may also result in reduced future returns to Unit Holders.

- **Cancellation of Units risk**

This is the risk that occurs when the Fund suffers losses and the value of a Unit goes below RM1.0000, and a consolidation exercise is carried out. A suspense account is created during the consolidation exercise where the investment loss is apportioned to each Unit Holder in accordance to their Unit holdings. Such Units will be cancelled

PRODUCT HIGHLIGHTS SHEET

	once the consolidation exercise is completed and this will result in a reduction in your Unit holdings.
POSSIBLE OUTCOME OF MY INVESTMENT	
Unit prices for this Fund may go down as well as up. The Fund is exposed to a variety of risks due to the nature of the investment strategy of the Fund. As such, the Fund does not provide any guarantee on the investment amount nor does it guarantee a fixed rate of return.	
It is important to note that an investment in the Fund carries risks and the above list of risks may not be exhaustive. While every care will be taken by us to mitigate the risk, you are advised that it is not always possible to protect investments against all risks.	
You are recommended to read the whole Information Memorandum to assess the risks of the Fund and if necessary, you should consult your advisers, e.g. bankers, lawyers, Shariah advisers, tax advisers or independent investment advisers for a better understanding of the risks.	
For more details, please refer to section 4.1 and section 4.2 in the Information Memorandum for the general and specific risks of investing in the Fund.	
Note: If your investments are made through an institutional unit trust scheme adviser (“Distributor”) which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed for the Fund and as a result, your rights as an investor may be limited. Accordingly, we will only recognise the Distributor as a Unit Holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed for the Fund.
