## PRODUCT HIGHLIGHTS SHEET

	<p><b>3) Liquidity Risk</b>          Defined as the ease with which a security can be sold at or near its fair value depending on the volume traded on the market. This is a risk more pertinent to a bond fund as bonds are generally not as easily liquidated in comparison to equities. In the event some of the underlying investments of the Fund are not actively traded, there is a risk the Manager may not be able to easily liquidate such investments and as a result, investors may face difficulties in redeeming their Units.</p> <p><b>4) Inflation / Purchasing Power Risk</b>          Described as increases of price level of goods and services and is commonly represented using the Consumer Price Index. High inflation reduces the purchasing power of a fixed sum of money. In an inflationary environment, fixed rate securities are exposed to higher inflation risk than inflation-linked securities.</p> <p><b>5) Shariah Risk</b>          The risk that the currently held Shariah-compliant securities in the Fund may be reclassified to be Shariah non-compliant upon review of the said securities by the SC's Shariah Advisory ("SACSC") performed twice yearly. If this occurs, the Manager will take necessary steps to dispose of such securities.</p> <p>Other risks to the Fund include market risk, fund management risk, non-compliance risk, operational risk, concentration risk and equity risk.</p> <p><i>Note:</i>          Investor should consider and understand the risks involved when investing in the Fund including the specific risks associated with the securities / instruments that the Fund will be investing in before applying for units. If in doubt, please consult your professional adviser for a better understanding of the risks.</p>
